

Legionella Control Within Hot and Cold Water Systems (WH003) City & Guilds Accredited

Course Overview:

This course will provide you with an understanding of how to control the risk from legionella bacteria within hot and cold water systems. It will enable effective management of the hot and cold water system in accordance with the Approved Code of Practice (ACOP) L8 and guidance document HSG274 Part 2.

Who Is This Course For:

This course is ideal for managers, supervisors or engineers who require knowledge of how to prevent and control legionella bacteria in the hot and cold water systems they are responsible for. Delegates undertaking this course who need the disinfection element can book both the one day disinfection and this three day legionellosis course (both courses to run concurrently).

Key Learning Areas Covered In This Course:

- Medical aspects of legionnaires disease
- Legal implications
- Potential mechanical and bacterial hazards from a hot/cold system
- Relevant statutory documents
- The requirements of Approved Code of Practice L8
- Hot and cold water system design
- Monitoring of water temperatures, tank inspections and water sampling
- Compilation and maintenance of the water management log book

Course Duration / Location:

3 day training course, available in York, Slough and Falkirk

Course Fees:

£795+VAT per delegate. Accommodation from £98+VAT per night (including DBB)
