

Risk Assessment For Legionella Control in Water Systems (WH004) City & Guilds Accredited

Course Overview:

This course will provide you with knowledge of how to assess the risk of being exposed to the legionella bacteria in water systems, including how to document the findings. Delegates will ideally have a prior knowledge of water systems.

Who Is This Course For:

This course has been developed for those who would like to become legionella risk assessors, or who need an understanding of how to carry out risk assessments on water systems.

Key Learning Areas Covered In This Course:

- The Legionellosis disease
- Risk assessment in relation to the ACOP L8 and BS8580
- How to identify susceptible areas in high risk water systems, in particular hot and cold water systems and evaporative cooling systems.
- Modification of water systems to eliminate/reduce the risk of legionellosis
- Written scheme requirements in accordance with ACOP L8 and BS8580
- How to sample water and required actions if bacteria is identified
- Risk assessment documentation

Course Duration / Location:

3 day training course, available in York, Slough and Falkirk

Course Fees:

£795+VAT per delegate. Accommodation from £98+VAT per night (including DBB)
